I benefit from listening to XM Satellite Radio and look forward to its traffic and weather channels planned for nearby Atlanta. There are numerous public radio stations who offer weather and traffic and I do not see how XM Radio's offering is competing with any of them (they are all in competition with one another). I especially enjoy how satellite radio provides variety and quality that is unique and not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of unique programming that I deserve.
